

## Tagline:

Centralize product management and track time.

## Short description:

TaskBite is a productivity app for individuals who work across multiple productivity platforms (Trello, Jira, Asana, etc.); and helps you centralize everything in one app.

## Long description:

TaskBite is a productivity app for individuals who work across multiple platforms (Trello, Jira, Asana, etc.); consolidate tasks from those platforms in one app, track time efficiently using the Pomodoro technique, and get intelligent insights to help you keep your productivity on top.

With Pomodoro technique, track your time efficiently and get the most out of your day with intelligent insights; like level of difficulty of tasks, estimated completion time, and optimal time to start them, and more...

## Key features:

- Track time using the Pomodoro technique.
- Integrate with Trello, Jira, Asana, Airtable, etc...
- Get notifications on when to start and what task to start with.
- Get insights on difficulty, estimate completion time and more using Machine Learning.
- Switch between different views: Kanban, Calendar or To-Do.
- iOS and Android app

## Key benefits:

- Declutter your workspace with a clean UI
- Your tasks are synced both on the app and your favorite platforms
- Ideal for solo founders and people who work on their side projects
- Avoid burnout with efficient time tracking using the Pomodoro technique
